ESI *e*Cloud & SIP Phones
Communication Begins with the Perfect Phone

In today's hyper-connected world it is more critical than ever to stay connected with clients and staff at any time, and from anywhere. When in the office, the business phone remains the most valuable and crucial aspect of any business' communications. Having the right phone for each user ensures that client calls are handled quickly and professionally. The full portfolio of ESI SIP Business Phones provides several different models to choose from, so users are equipped with the best phone to help them stay successful.

Since 1987, ESI has worked to perfect the desktop phone as the hub of business communications. Loaded with advanced - yet intuitive and easy to use - capabilities, the best features are always at users' fingertips. Each phone has been purpose-built to work seamlessly with ESI solutions, delivering an unmatched communications experience to users. Some providers lead their customers to believe that any generic phone and system combination will suffice, but only ESI designs our phones and solutions to work in unison to deliver the highest level of unified communications.

*e*PHONE 7 SIP BUSINESS PHONE

The ePhone7 is ideal for managers and executives who rely on quick access to business contacts and coworkers. Its large, 7" color touchscreen provides a unique view of coworker status and valuable ESI features. Its high-definition handset and full duplex speakerphone ensure the best audible experience.

User setup is not required, so the ePhone7 is ready to use upon installation. The ePhone7 takes a smartphone experience and puts it on the desktop phone for business communications. It simplifies what a business phone should do, while increasing its effectiveness.

Network Type	Supported ESI Systems	Programmable Keys	Voice Mail Key	HELP Key	Display	Speaker / Speakerphone	Web Dashboard Integration	Integrated Headset Jack
Gigabit Ethernet (PoE)	eCloud PBX	n/a	Yes; dedicated	Yes; on-screen icon.	7" color touchscreen	Yes / Yes; Full-duplex	Yes	Yes, RJ9

*e*PHONE 4 SIP BUSINESS PHONE

The ePhone4 is ideal for active phone users. Its 4" color display and 36 programmable feature keys help users achieve maximum productivity. A high-definition handset and full duplex speakerphone provide crisp, clear communication.

Several fixed feature keys put the most valuable ESI features just a button press away without the need for user programming. Extension statuses on the display makes the user more efficient at communication with coworkers.

Network Type	Supported ESI Systems	Programmable Keys	Voice Mail Key	HELP Key	Display	Speaker / Speakerphone	Web Dashboard Integration	Integrated Headset Jack
Gigabit Ethernet (PoE)	eCloud PBX	36 desi-less	Yes; dedicated	Yes	4" color display	Yes / Yes; Full-duplex	Yes	Yes, RJ9

ESI 45SIP BUSINESS PHONE

The ESI 45SIP Business Phone is ideal for most active ESI eCloud PBX users. A mid-size display and sixteen (16) programmable feature keys encourage users to customize their personal feature sets to increase productivity and efficiency.

The back-lit display and phone stand are both adjustable so the users can set up the phone to meet their preferences and have better ease-of-use. The ESI 45SIP supports high-definition (HD) audio for on-net calling.

Network Type	Supported ESI Systems	Programmable Keys	Voice Mail Key	HELP Key	Display	Speaker / Speakerphone	Web Dashboard Integration	Integrated Headset Jack
Gigabit Ethernet (PoE)	eCloud PBX	16	Yes; dedicated	Yes; dedicated	Three-lines, 56-characters w/ adjustable back-light	Yes / Yes; Full-duplex	Yes	Yes, RJ9

ESI 30SIP BUSINESS PHONE

The ESI 30SIP Business Phone is perfect for ESI eCloud users with lower call traffic. Users maintain access to system features with less customization options. ESI 30SIP users on eCloud PBX systems can also access the integrated web-based dashboard with advanced features.

Its back-lit display and twelve (12) programmable feature keys provide room for frequently contacted coworkers or business contacts. Several fixed feature keys put the most valuable ESI features just a button press away, without the need for user programming. The 30SIP also has an adjustable stand and can be wall mounted.

Network Type	Supported ESI Systems	Programmable Keys	Voice Mail Key	HELP Key	Display	Speaker / Speakerphone	Web Dashboard Integration	Integrated Headset Jack
Ethernet network port: 10/100 Mbps (PoE)	IP Server 900; eCloud PBX	12	Yes; dedicated	Programmable	Two-lines, 32-characters w/ adjustable back-light	Yes / Yes; Full-duplex	Yes	Yes, RJ9

*e*PhoneGO MOBILE APPLICATION (*FOR SMARTPHONES & TABLETS*)

Organizations wanting to offer a truly mobile work environment do so only when employees have the same benefits both in the office and when working remotely. By embracing mobile VoIP options, companies can offer their workers direct access, via their smartphones or other mobile devices, to the same office lines and features used in-house. The ePhoneGO (formerly *ESI Ditto*™) app takes the features that users love about the *e*Cloud PBX solution and places them in a unified, mobile application.

Unique *e*PhoneGO features include:*

- Hold, Transfer, and Park calls anywhere.
- On-the-fly Call Recording.
- Call hand-off.
- Contacts aggregation: view Contacts from synced accounts on your device.
- Single-number reach: calls to your work number can be automatically routed to your chosen destination.
- Voice Mail notifications: get alerted as soon as messages are left for you.
- Convenient call re-routing: set-up Call Forwarding and Do Not Disturb from anywhere.

**e*PhoneGO is only available with certain seat types. Contact your ESI Sales Rep for more information.*

*Required Operating Systems: Android™ 4.0 or later; iOS™ 7.0 or later.

ABOUT ESI
